

# TRUE BLISS

## Blockchain and Full Stack Developer

@ tru2bliss@gmail.com <https://truebliss.dev> <https://github.com/tru3bliss>

## SUMMARY

Innovative Blockchain Developer with 6 years of experience specializing in Solana, EVM blockchain technology and smart contract development. Skilled in Rust, Solidity, and JavaScript, with expertise in building dApps, DeFi solutions, and optimizing transaction performance. Proficient in blockchain architecture, security audits, and scalable systems. Proven ability to deliver cutting-edge blockchain solutions through collaboration and remote teamwork.

## EXPERIENCE

### Blockchain Developer

#### Freelancer

📅 08/2018 - 2025 📍 Remote

Delivering scalable Web3 solutions with a strong emphasis on innovation, security, and seamless blockchain integrations.

- Designed and developed a decentralized **Web3 blogging platform** on Solana, similar to Mirror.xyz, handling front-end, back-end, and smart contract development for an optimized user experience.
- Engineered and deployed secure, high-performance smart contracts on Solana using Rust and the Anchor framework, including custom adaptations such as a specialized fork of **Pump.fun**.
- Developed and integrated advanced Solana **trading bot** solutions, featuring token sniping, arbitrage, liquidity management, and pool creation, with seamless DEX integrations (Raydium, Orca, Fluxbeam) and cross-platform support via Telegram and Discord.
- Built and deployed **prediction market and betting smart contracts**, ensuring transparency, security, and efficient payout mechanisms for decentralized wagering systems.

### Junior Blockchain Engineer

#### Blockchain Innovations Ltd

📅 09/2018 - 11/2020 📍 Remote

**Blockchain Innovations Ltd** is a specialized blockchain development team focused on decentralized solutions and smart contract innovation.

- Facilitated the migration of blockchain solutions from Ethereum to Solana, driving substantial cost savings and enhanced transaction throughput.
- Contributed to the development and rigorous testing of smart contracts on both Ethereum and Solana platforms.
- Partnered with product teams to seamlessly integrate Solana technology into existing applications, elevating performance and scalability.

## PROJECTS

### Wordeet

Wordeet is a Web3 blogging platform on Solana, similar to Mirror.xyz.

- Leveraging Irys for decentralized data storage
- Fully integrated smart contract backend and a user-friendly front-end interface

### Prediction Market and Pump.fun Smart Contract

Custom smart contracts enabling decentralized **prediction markets** and specialized **Pump.fun** fork implementations.

- Enhanced Pump.fun fork with tailored mechanics for unique token launches and liquidity strategies.
- Designed for secure and transparent betting mechanisms with enhanced customization and scalability.

### Pennyauction Smart Contract

Smart contract for casino

- Designed a token swap mechanism for proof-of-stake protocols and implemented white-listed token functionality

## SKILLS

### Blockchain Development

Blockchain Technology, Solana, EVM, Web3, Cryptography, Smart Contracts,

### Decentralized Solutions

DeFi, DAO, ICO, Token & NFT Staking, SocialFi, MarketPlace, Staking, Trading Bots

### Programming & Frameworks

Rust, Solidity, Web3.js, React, Next.js, Node.js, JavaScript, TypeScript, Anchor, C++, C, C#, Python

### Tools & Infrastructures

Anchor, IRYS, ARWEAVE, IPFS, Git, Hardhat, Visual Studio

### Database

MySQL, MongoDB, FireBase, Data Chain

### Security & Performance

Blockchain Architecture, Performance Optimization, Scalability, Security Audits

### Collaboration Tools

Discord, Slack, Telegram, X

## EDUCATION

### Bachelor of Computer Science

#### University of Technology

- Focus: Distributed Systems, Cryptography, Data Structures, Algorithms

## STRENGTHS

### Collaboration

Working in a team motivates me to give 100% every day. Collective intelligence is the most powerful tool for companies.
